- HARD COPIES OF THIS FORM SHOULD BE COMPILED AS PART OF THE STUDENT'S PORTFOLIO.

DATE	April 22 2025 - April 25 2025	AREA ASSIGNMENT	ICTO
TASK	Lecture and Orientation	SHIFT/TIME	8am to 5pm

Software Development:

During the first week of our OJT, we did not yet begin development tasks but were introduced to the upcoming project we would be working on. We were briefed on the technologies we would be using, particularly CodeIgniter 4 and MySQL, which will be used to build the Tarpaulin Ticketing System for the City Information Office.

Technical Documentation Skills:

We were oriented on how to properly document our work throughout the training. This included maintaining daily journals, task tracking, and organizing development notes would later be used for the system documentation and user guides.

Other IT-Related Activities:

We attended the general orientation at Biñan City Hall, where we were introduced to the workplace policies, expectations, and the ICTO team. We also familiarized ourselves the tools, equipment, and basic procedures within the office. Additionally, we observed how the staff handles technical support requests and ongoing internal IT operations.
