- INCLUDE TASK ASSIGNMENTS OR MOVEMENTS, REFLECTION ON THE DAY'S NEW LEARNING, ACCOMPLISHMENT, CHALLENGES FACED AND HOW YOU RESPONDED, OBSERVATIONS AND RECOMMENDATIONS ON THE IMPROVEMENT OF SYSTEMS / OPERATION / MANAGEMENT, ETC.
- SCANNED COPIES OF THIS FORM SHALL BE SUBMITTED ON A WEEKLY BASIS THROUGH APPROVED LMS.
- HARD COPIES OF THIS FORM SHOULD BE COMPILED AS PART OF THE STUDENT'S PORTFOLIO.

DATE	May 19 2025 - May 23 2025	AREA ASSIGNMENT	ICTO
TASK	Tarpaulin Request	SHIFT/TIME	8am to 5pm

Software Development:

In Week 5 of our OJT at Biñan City, we continued developing the dashboard components of the Tarpaulin Ticketing System. Our main focus was to build dashboards that would allow LGU staff to view, manage, and respond to tarpaulin requests submitted by various departments. We implemented core features such as ticket filtering, status update controls, admin login authentication, and basic sorting and search functions. To enhance usability, we also worked on improving the design using Bootstrap.

Software Development:

We updated the feature list and module descriptions based on the new dashboard functionalities. Additionally, we began drafting a user guide for the admin role, including screenshots and brief descriptions of each dashboard function. These documents will help future users understand how to operate and manage the system efficiently.

Other IT-Related Activities:

We continued observing how LGU staff process requests in real life and considered their feedback in adjusting how the dashboard functions. This week also involved short internal check-ins with the ICTO team, helping us align our system features with the actual needs of the City Information Office.
